

Nullshift Partner Rate Card

Effective 9 October 2026. Source of truth: docs/partners/PROGRAMME-BRIEF-2026-10-09.md. All prices in GBP, exclusive of VAT. Partner price = list × 0.75, rounded up to the pound.

1. Monthly plans

Published "from" prices (pricing version NSI_v2_2026_09) apply to a Standard-band client. The arithmetic:

PLAN	LIST (BASE)	× 0.75	PARTNER PRICE (BASE, ROUNDED UP)	RESPONSE TARGET
Core	£149 / month	£111.75	£112 / month	2 UK business days
Pro	£249 / month	£186.75	£187 / month	1 UK business day
Max	£399 / month	£299.25	£300 / month	4 UK business hours
Enterprise	Quoted	—	Quoted × 0.75	Contracted SLAs

Scale banding. The base price is multiplied by the client's scale band, scored on audience, commercial criticality, technical load, organisation reach and complexity, and rounded up to the pound. The 25% comes off the banded figure, so the partner discount is the same percentage for every client.

BAND	MULTIPLIER	CORE LIST → PARTNER	PRO LIST → PARTNER	MAX LIST → PARTNER
Standard	×1.0	£149 → £112	£249 → £187	£399 → £300
Growth	×1.5	£224 → £168	£374 → £281	£599 → £450
Established	×2.5	£373 → £280	£623 → £468	£998 → £749
Scale	×4.0	£596 → £447	£996 → £747	£1,596 → £1,197
Critical	×5.5	£820 → £615	£1,370 → £1,028	£2,195 → £1,647
Enterprise	Reviewed	Quoted	Quoted	Quoted

A margin floor on attributable vendor cost can lift the price above the banded figure for unusually heavy usage; the estimator shows it when it applies.

2. Build fees — examples from the guided estimator

Fixed-price builds are quoted by the guided estimator from the client's size and feature list. These three are representative outputs at the current working assumptions; quote the live tool for any real client. "Guide" is the price put on the quote; the range is the low/high scenario.

EXAMPLE BUILD	GUIDE PRICE (LIST)	RANGE (LIST)	PARTNER PRICE (25% OFF GUIDE)
Website (5 pages) + CRM / lead capture · 3 staff, 1 site	£4,600	£3,600 – £6,300	£3,450
Online booking + payments + automated messaging · 4 staff, 1 site, ~300 customers/month	£6,200	£4,800 – £8,100	£4,650
Booking + payments + customer portal + staff dashboard (3 roles) + reporting, with accounting and calendar integrations · 12 staff, 2 sites, ~800 customers/month	£14,300	£11,600 – £19,400	£10,725

Every build includes discovery and design, foundation (hosting, sign-in, database, deployment, backups), testing, launch, training and handover notes, plus a 30-day defect warranty. Data migration, further integrations, sensitive-data hardening and tight deadlines add to the price; the estimator itemises each one.

3. Referral fees

10% of the build fee at list, paid pro-rata as each 50 / 25 / 25 milestone clears, within 14 days of each. No share of the monthly plan.

BUILD FEE (LIST)	REFERRAL FEE	PAID AS MILESTONES CLEAR (50 / 25 / 25)
£3,000	£300	£150 · £75 · £75
£6,000	£600	£300 · £150 · £150
£12,000	£1,200	£600 · £300 · £300

4. Payment terms

- Builds (both models): 50% on project commencement, 25% at the agreed build milestone, 25% before production handover. Quotes valid 30 days.
- Referral: we invoice and collect from the client at list. Your 10% is paid pro-rata as each milestone clears — 5% of the build fee after the 50% milestone, 2.5% after each 25% milestone — within 14 days of each.
- White-label: we invoice you at partner price on the same milestone schedule; you invoice your client at your retail price. Monthly plans are invoiced to you monthly in advance; you bill your client however you choose.
- Prices are in GBP and exclude VAT. Payment-processor fees (for example Stripe) are the end client's and are never part of our price.

5. What the monthly plan includes

Core — keep it live. Managed hosting, deployment, domain/DNS and SSL · dedicated production database (paid Supabase plan included) · routine maintenance, daily

backups and service monitoring · fault investigation and fixes against the signed-off scope · standard support queue (2 UK business days) · guidance on using the system.

Pro — run it properly. Everything in Core · managed AI/API and transactional email infrastructure within the normal usage band · enhanced monitoring of API failures, email delivery and key integrations · priority support (1 UK business day) · configuration support for existing features, workflows and integrations.

Max — a technical partner. Everything in Pro · a named technical owner · priority queue (4 UK business hours) · quarterly roadmap review · monthly platform health review · feature discovery and technical scoping included · priority scheduling for accepted feature projects.

No plan includes new development. New features are separately quoted fixed-price projects (partner price applies).

6. Programme terms, in brief

Non-exclusive · no minimum volume · every client and piece of work subject to acceptance review · 30 days' notice either side · live client systems are never switched off · the end client owns their code, database and accounts.
